

Estructuras Simples 1 (C#)

```
1 // See https://aka.ms/new-console-template for more information
2 using System;
3 namespace workerBonus // Note: actual namespace depends on the project name.
4 {
5     0 references
6     internal class workerBonus
7     {
8         0 references
9         static void Main(string[] args)
10        {
11            Console.WriteLine("Those who have worked for at least 5 years now get a $1000 bonus!");
12            Console.WriteLine("For how long has this person been working for? (In years) ");
13            int age = int.Parse(Console.ReadLine());
14            if(age >= 5){
15                Console.WriteLine("This worker can now get the $1000 bonus!");
16            };
17            if(age < 5){
18                Console.WriteLine("No bonus for this worker...");
19            };
20        }
21    }
22 }
```

```
PS C:\Users\user\Documents\COMP2315-LM\LabsC#\workerBonus> dotnet run
Those who have worked for at least 5 years now get a $1000 bonus!
For how long has this person been working for? (In years)
3
No bonus for this worker...
PS C:\Users\user\Documents\COMP2315-LM\LabsC#\workerBonus> dotnet run
Those who have worked for at least 5 years now get a $1000 bonus!
For how long has this person been working for? (In years)
5
This worker can now get the $1000 bonus!
PS C:\Users\user\Documents\COMP2315-LM\LabsC#\workerBonus>
